RE: Acceptance, Closure Summary Report for Closure of RCRA Unit 13 in Building 884 (including approval of Building 884 D&D Closeout)

Dear Mr. Rampe and Mr. Nesta:

The Colorado Department of Public Health and Environment, Hazardous Materials and Waste Management Division (the "Division") previously received the subject report from Kaiser-Hill Company dated January 29, 2003. The Division, in a letter dated December 30, 2002, effectively approved a Notification to utilize the *RSOP for Facility Component Removal, Size Reduction and Decontamination Activities* protocol from DOE, dated November 29, 2002.

The Division's December 30, 2002 letter stipulated that Alternative Treatment Standards for Hazardous Debris of Section 268.45 of the Colorado Hazardous Waste regulations (6 CCR 1007-3) be met in lieu of Clean Closure Option 1 of the RSOP. Our review of the Closure Summary Report (CSR) indicates that the stipulation was met, that the floor of the unit was rinsed, inspected and met the "clean debris surface" requirement. Concrete waste was removed and disposed properly as solid waste.

Accordingly, the CSR for the unit is accepted. As the unit was synonymous with Building 884, the CSR is deemed equivalent to a D&D Closeout Report for the building, and is approved.

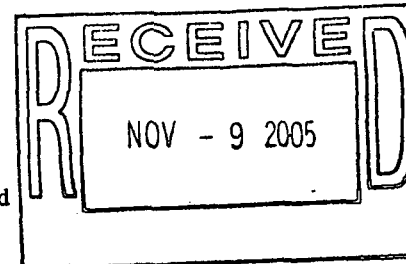

If you have any questions concerning this correspondence, please contact me at 303-692-3367 or Harlen Ainscough at (303) 692-3337.

Sincerely,

David A. Krucke
Acting Rocky Flats Oversight Unit Leader
